Coloma Community Schools Curriculum Materials Review Cycle

Coloma Community Schools reviews one area of curriculum materials on an annual basis to provide continuity for teachers and fiscal responsibility for the school district. Our curriculum materials are on a six-year review cycle. Upon adoption of a new curricular material, the district will continue that material for six-years. During the non-evaluative year, the expectation is to make continuous improvement of the materials to align with our guaranteed and viable curriculum, as determined by our Professional Learning Communities. Below is the breakdown of the year of adoption for the following subject areas:

- Mathematics – 2020-2021
- Science – 2021-2022
- Social Studies – 2022-2023
- English Language Arts – 2023-2024
- Arts, Electives, and Specials – 2024-2025
- Assessment and Credit Recovery Tool – 2025-2026

Utilizing the six-year curriculum materials review cycle, the following materials are up for their review during the following school year. As a reminder, our Professional Learning Communities have set the guaranteed and viable curriculum, and this process is to evaluate and adopt the materials that best align with our essential standards.

- Mathematics – 2026-2027
- Science – 2027-2028
- Social Studies – 2028-2029
- English Language Arts – 2029-2030
- Arts, Electives, and Specials – 2030-2031
- Assessment and Credit Recovery Tool – 2031-2032

The superintendent will develop and implement procedures to support the Curriculum Resource Review Cycle through the work of Professional Learning Communities. These procedures shall align with Board Policies 2210 (Curriculum Development) and 2510 (Adoption of Textbooks).
