HELLGATE ELEMENTARY SCHOOL DISTRICT

MAST Assessment Update

Student Score Reports & Family Resources | Fall 2026

Your Child's Score Report Is Coming Home

Your child's 2025–2026 MAST Summative Score Report provides information about performance in English Language Arts and Mathematics.

Grades 3–6: Reports will be shared during our November parent-teacher conferences.

Grades 7–8: Reports will be sent home with students in November.

Understanding the Results

MAST measures student learning throughout the year using smaller assessments called testlets. The final report includes an overall scale score, achievement level, and information about student strengths and areas for growth.

Four Achievement Levels

Advanced Exceeded expectations	**Proficient** Met expectations
Partially Proficient Partially met expectations	**Novice** Did not meet expectations

No single assessment captures everything a child knows and can do. These results are one part of understanding student learning.

View Additional Results Online

Families can access individual testlet reports through the secure Kite Parent Portal using their registered email address and a temporary access code.

Additional Resources for Families

Visit the Hellgate Assessment webpage for helpful resources, including:

- **Understanding Your Child's MAST Score Report:** A guide to interpreting assessment results and achievement levels.
- **Kite Parent Portal Instructions:** Information about accessing your child's individual testlet results online.
- **MAST Assessment Information:** Additional information about Montana's statewide assessment.

Questions? Contact your child's teacher or Erin Ellis, Ed.D., Director of Curriculum and Assessment.
