Pepino Melon

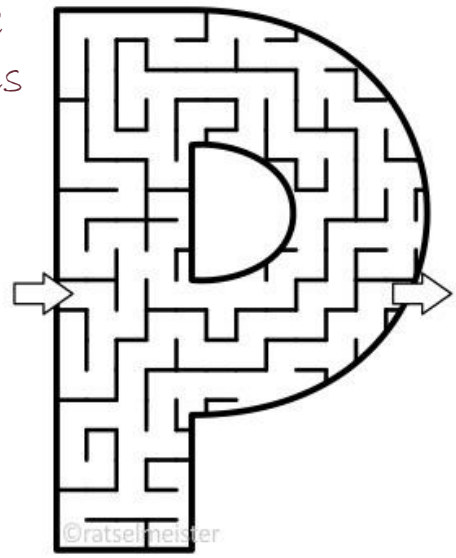

This oval-shaped, smooth-skinned fruit is native to South America. Also known as Pepino Dulce, or sweet cucumber in Spanish, the Pepino turns from green to yellow as it ripens and develops striking purple stripes when mature. The entire fruit is edible, including the skin and seeds.

Pepino Melons have a pear-like texture and a mellow cantaloupe-cucumber flavor. The entire fruit is edible, including the skin and seeds!

Help Paul the Pepino find his way through the maze!
