AP Program Statistics:
- School specific data first available in 2027
- District data:
  - Score of 3+: 81%

CREDITS

Year-long courses are divided into 10 units, and the 10 units are equal to 1 Carnegie Unit. Students receive credit only for units mastered at an A or B level. Secondary transcripts show the number of units completed for each course per school year and the average grade for the units completed in each course. The transcript is a living document with units added as completed.

GRADING SYSTEM

Teachers evaluate mastery of each unit with an A or B. B represents mastery of the unit, and A represents mastery with higher order thinking skills. Work resulting in traditional Cs and Ds is not accepted. Students who master a unit with a B evaluation may attempt to demonstrate a higher level of mastery within a given time period to achieve the A. There are not quarter, semester, or term evaluation periods; student performance is assessed on each unit of study as they are completed.
