## Version 24.1-R1 (Build 04) *(Released 10/27/2026)*

# Features

- **Standards View on the Assignments Tab:** The Assignments tab in the student record now has an option to view the score by standards. This view shows a list of the standards associated with the course and the most recent standard score.
- **NYS Courses and Assessment Updates:** Per NYS guidelines, updates are being made to some NYS courses including adding new courses, inactivating others, and updating course names. Additionally, new AP exams and associated assessment dates are being added and changes are being made to the short name for some assessments.
- **Allow AI Chat in Advanced Analytics:** A new permission will allow subscribing districts to control access to the chat button in Advanced Analytics by user group. Submit a ticket to the Mindex Help Desk or contact your Advanced Analytics liaison for more information on adding Chat for your district.
- **Redirect to Advanced Analytics Quick Console:** Users with Advanced Analytics Author Pro access can enable a new permission that will automatically redirect to the Quick Console when visiting the Dashboards/Advanced Analytics sub-module.
- **Advanced Analytics Synchronization Updates:** Updates have been made to the way in which user group assignments and permissions are synchronized from SchoolTool. These updates drastically improve synchronization speed and consistency for Advanced Analytics feature and security configuration including RLS, CLS, Chat, and Console access.
- **General SchoolTool Optimizations:** Through our enhanced monitoring capabilities Mindex has identified areas in SchoolTool where database procedures can be optimized for improved performance and efficiency. These updates are behind-the-scenes and do not change the way users interact with the screen. The following areas will be optimized in this release: Navigating to the Counseling > Grades tab in the student record, navigating to the teacher roster and attendance screen, and navigating to the My Home > Grades tab.

## Fixes

| Location | Ref # | Description |
|---|---|---|
| Advanced Analytics | 95660 | Users with access to both the Analytics Console and the embedded dashboards in SchoolTool will no longer see duplicated dashboards when navigating from the console to an embedded dashboard. |
| Advanced Analytics | 95860 | Users enabling the new Redirect to Quick Console permission will not encounter a RelayState error when loading Advanced Analytics.<br>*Also reported in: 96263* |
| Batch Selector | 56793 | When using the User Defined Screen batch selector term, a system error will no longer display when searching for information in a field whose short name contains an apostrophe. |
| Batch Selector | 92731 | When using the BEDS Provider and District search terms, the returned results will update as expected if the search is modified to use a different BEDS Provider. |
| Batch Selector | 58723 | When saving a search using the Custom Alert batch selector term, the state of the "Does Not Have" checkbox will be retained. |
| Batch Selector, Counseling | 57293 | When using Counseling > Grade Search or the Grade Search batch selector term, the courses returned will respect the selections made for the Building and School Level in the provided drop-downs.<br>*Also reported in: 69050, 69113, 69403, 77461, 82369, 85409, 92862* |
| Counseling, Maintenance, Teachers | 92402 | The order of Employability Profile topics (standard trees) in grade book assignments and on the Submit Employability Profile Grades screen will match the order configured for that Employability Profile in Maintenance. |
| Maintenance | 95815 | The Student Class Grade Detail data warehouse extract will report the BEDS code associated with an institution instead of the Institution code.<br>*Also reported in: 95826, 95969* |
| Medical | 92893 | Performance improvements have been applied to the **Medical > Today's Remaining Visits** sub-module to prevent users from receiving server errors when completing tasks in this area during high usage times. |
| Teachers | 92617 | Using the "Roll up standard grades to parent" option on the Submit Descriptor/Standard Marking Period Grades screen will no longer result in an error when the grading scale in use for associated standards is numeric. |
| Teachers | 95492 | Users that do not have any existing saved preferences will not see pop up errors when loading the grade book.<br>*Also reported in: 95367, 95526, 95534, 95553, 95606, 95634, 96109, 96472* |
