COLTON REDLANDS YUCAIPA
REGIONAL OCCUPATIONAL PROGRAM
Inspiring Possibilities

Mechatronics

Manufacturing & Product Development

Explore the world of robotics, electronics, and mechanical engineering through hands-on training. Learn to design, build, troubleshoot, and maintain automated systems while preparing for careers in advanced manufacturing.

Innovate. Automate. Create.

- **Industry Preparation** —Develop technical skills in robotics, electronics, and automated systems while preparing for careers in advanced manufacturing.
- **Cost Savings** — Gain hands-on engineering and technical training during high school at no tuition cost, reducing future education expenses.
- **College Credit** — Students may qualify for college credit through articulation agreements, subject to eligibility requirements.

YOUR PATHWAY

Mechatronics 1
Concentrator

Learn the fundamentals of mechanical systems, electronics, and engineering design through hands-on projects.

Mechatronics 2
Capstone

Advance your skills in robotics, automation, and troubleshooting while preparing for technical careers.
