COLTON REDLANDS YUCAIPA
REGIONAL OCCUPATIONAL PROGRAM
Inspiring Possibilities

Veterinary Assistant

Agriculture & Natural Resources

Explore the world of veterinary medicine through hands-on training in animal care, anatomy, health, and clinical procedures. Develop essential skills to prepare for careers in veterinary medicine and animal healthcare.

Care. Learn. Make a Difference.

- **Industry Preparation** — Build hands-on skills in animal handling, veterinary procedures, patient care, and clinical safety while preparing for entry-level opportunities in animal healthcare.
- **Cost Savings** — Gain valuable veterinary training and hands-on animal care experience at no tuition cost before pursuing higher education or certification.
- **College Credit** — While this pathway does not currently offer articulated college credits, both courses are approved as UC A-G electives.

YOUR PATHWAY

Veterinary Assistant 1
Concentrator

Explore veterinary science through animal anatomy, physiology, nutrition, disease prevention, and basic animal care while developing essential clinical skills.

Veterinary Assistant 2
Capstone

Build advanced veterinary skills through clinical procedures, diagnostic testing, patient care, medical records, and animal health practices.
