Grade: 3rd Grade
Number of Players: 1
Standard: 3rd Grade - Automatically divide up to 5x5 and 10x10

Target Snap

Materials Needed:

- Deck of playing cards (Aces = 1, Numbers 2–10; remove face cards and Jokers)

How to Play:

1. Pick the target divisor - either 5 or 10.
2. Place the the cards face down in a draw pile.
3. Flip cards one at a time. Multiply the flipped card by your target divisor in your head, then instantly state the full division fact aloud (e.g., if you flip a 7, say "35 ÷ 5 = 7").
4. If you hesitate for more than 5 seconds, place that card at the bottom of the deck to try again later. Continue until all cards are cleared. (Modification: You can set a timer for 2 minutes and see how many you can complete correctly. Replay with the goal to increase the number you get correct.
