Grade: 5th Grade
Number of Players: 2
Standard: 5th Grade - Automatically multiply up to 12x12

Multiplication Card Battle

Materials Needed:

- Deck of playing cards - remove the Kings and Jokers

How to Play:

1. Shuffle and divide the cards equally between players. Keep your cards facedown. Use these card values:

   Ace = 1

   Number cards = their printed number

   Jack = 11

   Queen = 12
2. Both players turn over two cards.
3. Multiply the numbers on your cards.
4. Say your entire fact aloud. For example, if you turn over a 6 and a 9, say, “6 × 9 = 54.”
5. The player with the greater product keeps all four cards in a separate winning pile. If the products are equal, each player keeps their own two cards.
6. Continue until each player has fewer than two cards left. The player with the most cards wins.

Speed Flash Multiply

Materials Needed:

- Deck of playing cards - remove King and Joker cards, use aces as 1, Jack = 11, Queen = 12

How to Play:

1. Pick a fixed multiplier card from the deck and place it face-up in the center.
2. Shuffle the remaining cards into a facedown draw pile.
3. Flip the top card as fast as possible.
4. Multiply the flipped card by the center card in your head, then immediately state the complete multiplication sentence aloud (e.g., center card is 11(Queen), flip an 6 and say 11 × 6 = 66).
5. Continue until you have gone through all the cards in the deck.
