Grade: 5th Grade
Number of Players: 1

Standard: 5th Grade - Automatically divide up to 12x12

Target Snap

Materials Needed:

- 1 standard 6-sided die
- Deck of playing cards (Aces = 1, Numbers 2–10; Jack = 11
- Queen = 12, remove Kings and Jokers)

How to Play:

1. Roll the die to set your target divisor for the round (e.g., a roll of 4 = divisor of 4).
2. Place the the cards face down in a draw pile.
3. Flip cards one at a time. Multiply the flipped card by your target divisor in your head, then instantly state the full division fact aloud (e.g., if you flip a 4, say "28 ÷ 4 = 7").
4. If you hesitate for more than 5 seconds, place that card at the bottom of the deck to try again later. Continue until all cards are cleared. (Modification: You can set a timer for 2 minutes and see how many you can complete correctly. Replay with the goal to increase the number you get correct.
