KoroBoro International School Strengthens Positive Behaviour for Learning

KoroBoro International School is strengthening its Positive Behaviour for Learning (PBL) approach across its Koro and Boro campuses, with a focus on using restorative practices to address student behaviour and build positive relationships.

The restorative process encourages students to understand their actions, take responsibility for their behaviour and learn to make better choices. This approach helps students understand how their behaviour impacts others and encourages them to take responsibility and make amends.

When behaviour concerns arise, teachers and staff are encouraged to listen to the students involved, understand what happened and guide them towards making better choices. Depending on the situation, this may include a restorative conversation, an apology or another suitable action to repair the harm caused.

This approach does not mean that inappropriate behaviour is ignored. Students are still expected to follow school expectations and take responsibility for their actions. The aim is to ensure that behaviour is addressed in a fair and consistent way while helping students develop respect, responsibility and self-control.

A key focus is ensuring that staff across both Koro and Boro campuses follow a consistent approach when responding to student behaviour. By working together, teachers and staff can create a safe, supportive and respectful learning environment for all students.

Through Positive Behaviour for Learning, KoroBoro International School continues to encourage students to learn from their experiences, build stronger relationships and make positive choices both inside and outside the classroom.

Grade 6 Student Leaders Taking the Lead Through Peer Mediation

At KoroBoro International School, our Grade 6 student leaders are stepping up as Peer Mediators, helping fellow students resolve simple conflicts peacefully. Through sessions with Mr Jerome, Head of Student Welfare, they learned about peer mediation and how they can support a positive school environment. With teachers' guidance, they have begun practising these skills by helping their peers listen to one another, understand different perspectives and find respectful solutions.

This initiative gives our senior students a meaningful opportunity to practise leadership, develop empathy and take responsibility at an age-appropriate level. They are learning that being a Peer Mediator is about listening without taking sides and knowing when to seek teacher support. Through this experience, our Grade 6 leaders are making a positive contribution towards building a safe, respectful and supportive school community.

Walkway Signs Support Whole School Expectations

New walkway signs have been placed around the Koro and Boro campuses to remind students about safe and responsible behaviour.

The signs share simple messages such as **"Walk," "No Running"** and **"Walk on the Left Side."** These reminders help students move safely around the school and show respect for others.

By following the signs, students can avoid accidents, especially during busy times such as recess, lunch breaks and class changes. Walking on the left side also helps everyone move around the campus in an organised and respectful way.

The signs support the school's Whole School Expectations by encouraging students to be safe, respectful and responsible every day. They are easy to see and understand, helping all students remember the right choices to make while moving around the school.

The Koro and Boro campuses are committed to creating a safe and positive learning environment for everyone. These new walkway signs are a simple but effective way to reinforce good behaviour and keep our school community safe.

Welcome to 1RD

WELCOME TO THE INFORMER

The Student-Led Conference highlighted the powerful partnership between home and school. By giving students ownership of their learning and a voice in sharing their achievements, we are helping them build confidence, responsibility and a strong sense of pride in their work. The event was a wonderful reminder that when students, families and teachers work together, learning becomes more meaningful and success becomes a shared celebration.

Welcome to 3RR

WELCOME TO THE INFORMER

"Solar System Powers Earth's Changes."

"I spin all day and all night! I travel around the Sun, and my friend the Moon circles around me. Together, we create some amazing changes!"

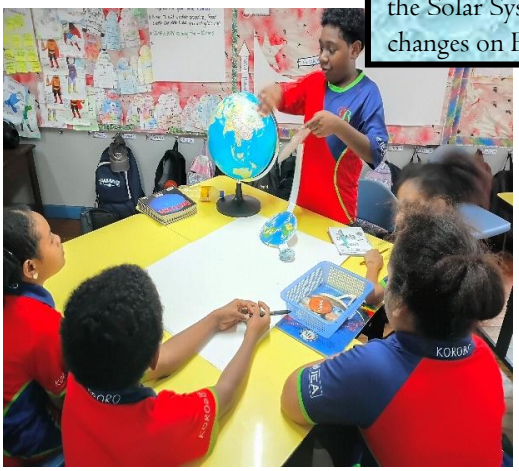

Welcome aboard to our space adventure! This term, we the curious 3RR learners are exploring the Learning Inquiry theme **"Solar System Powers Earth's Changes."** We ask questions, investigate ideas, and think like scientists, we are discovering how our Solar System helps shape the world around us every day.

The Solar System powers Earth's changes because the Sun, Earth, and Moon are constantly moving. Earth's spin creates day and night, Earth's journey around the Sun creates years and seasons, and the Moon's movement around Earth creates the moon phases we see in the sky. Together, these movements shape many of the patterns and changes we experience every day.

Students are collaborating in groups to explain how the Solar System influences changes on Earth.

LITER ACY BLOCK

INTERACTIVE READ ALOUD

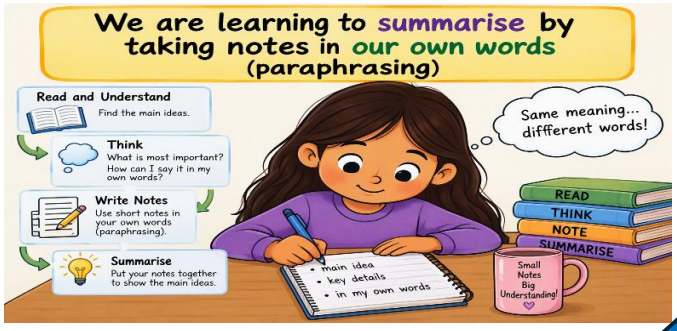

4DS

This term, Grade 4DS students are developing their comprehension skills through the strategies of **summarising** and **synthesising**.

Summarising helps students identify the most important information in a text and retell it in their own words.

Synthesising encourages students to combine information from a text with what they already know to form new understanding.

Through Interactive Read Aloud class discussions, and independent reading activities, students are building these skills to become more confident, thoughtful, and independent readers.

Why is it important?

Interactive Read Aloud helps students:

- Develop comprehension skills.
- Expand vocabulary.
- Strengthen listening and speaking skills.
- Think critically about texts.
- Build a love of reading.

4DS HIGHLIGHTS ..

What does it look like in the classroom?

During an IRA lesson, students may:

- **Predict** what might happen next.
- **Question** the text and discuss ideas.
- **Summarise** key information.
- **Make connections** to prior knowledge.
- **Synthesise** new learning and develop deeper understanding.

Welcome to Grade 6TK

WELCOME TO THE INFORMER

Learning Together, Growing Together

As our final weeks of primary school unfold, 6TK is making every moment count. We continue to learn collaboratively, support one another, and celebrate each other's successes. With the valued assistance of Mr. Hagunama, our IEA Teacher Trainee, students are embracing challenges, asking questions, taking risks, learning from mistakes, and persevering with confidence. It is wonderful to see everyone growing into resilient and independent learners.

Yard Duty Responsibilities

Our yard duty responsibilities have provided valuable opportunities to develop leadership and responsibility. By assisting duty teachers in designated areas, students have learned the importance of safety, fairness, and caring for others. We are proud of how our students have stepped up as positive role models within the school community.

Inspiring Minds Through STEM

STEM lessons continue to spark excitement and curiosity in our classroom. Through designing and constructing models of real-world objects, students have explored the thinking behind how things are built and why they work. These hands-on experiences have encouraged creativity, problem-solving and a deeper appreciation for the world around us.

Brisbane Excursion: Memories for a Lifetime

Our Brisbane Excursion was truly unforgettable. Beyond the sights and experiences, students created lasting memories, strengthened friendships, built confidence, and practised independence. The journey has helped shape a new version of ourselves, one that is more confident, capable and ready to embrace future opportunities with enthusiasm.

As we approach the end of our primary school journey, we celebrate how far we have come and eagerly anticipate the future ahead.

KORO ICT NEWS

TERM 4 EDITION

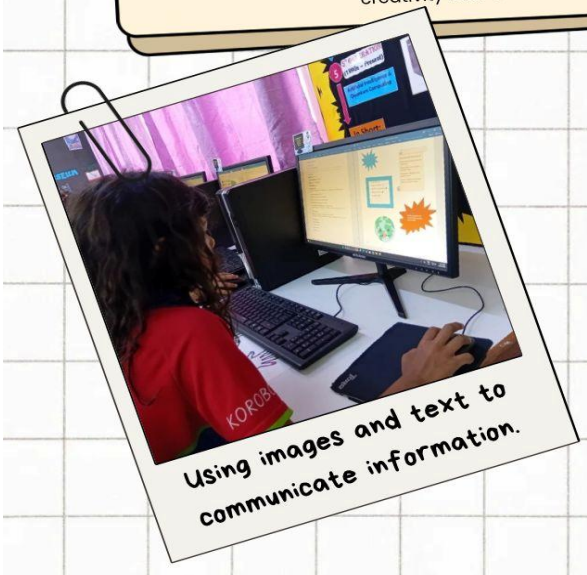

What's happening in the lab?

To all parents, we would like to thank you for your continued support towards your child's learning. In the second semester, students in Grades 3 to 6 are building practical digital skills through creative and encouraging activities in the ICT lab. Students are learning data entry in Excel and using Sketch Up to create 3D designs.

They are also developing publication skills and learning to browse safely when researching online. Their work in the ICT lab reflects the many ways learning can be both useful and creative. Thank you for celebrating students' learning and creativity with us.

Organizing information for a chosen audience and purpose.

Using images and text to communicate information.

Researching online using safe websites, identifying target audience and suitable digital product.

Parents take note

Please talk with your child regularly about staying safe online. Encourage them to use strong, private passwords, avoid sharing personal information and think carefully before clicking links or communicating with strangers. Remind them to tell a trusted adult if something online makes them feel uncomfortable, worried, or unsafe. Review privacy settings together and keep devices and apps up to date. Stay SMART Online!

KAHOOT! QUIZ TIME!

Last term in the Discovery Centre, we enjoyed Read Alouds, Kahoot! quizzes and writing Ranu in Unexpectedland, our fourth collaborative story, created with Mrs O, Mr Keri and every class. Now we're looking forward to more Kahoot! challenges! In our teacher-hosted Chat Room, we test our knowledge in a fun way – playing individually or as teams. Get ready to think fast, learn together and celebrate what you know!

Think • Choose • Learn • Have Fun!

TERM 4 VISUAL ARTS • GRADES 3–6

GRADE 6 / IMPRESSIONISM

GRADE 4 / RECYCLED FISH

GRADE 5 / SCREEN PRINTING

MAKING, EXPLORING, DISCOVERING

GRADE 3 / PRINTING & COLLAGE

Inspired by Hannah Höch, students layered images, shapes, colours and textures into imaginative compositions.

GRADE 4 / RECYCLED FISH

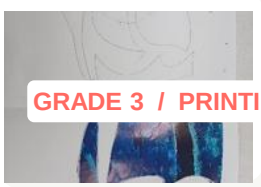

Students reshaped everyday plastic containers into colourful 3D fish, combining construction skills with recycling.

GRADE 5 / SCREEN PRINTING

Stencil and pattern experiments inspired by William Morris explored culture, identity and creative expression.

GRADE 6 / IMPRESSIONISM

Monet and Renoir inspired loose brushstrokes, colour and light to capture everyday scenes and landscapes.

GRADE 3 / PRINTING & COLLAGE

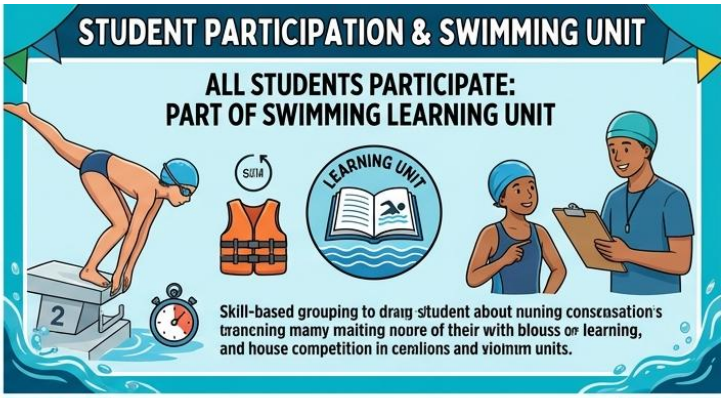

Young artists at work

Make a Splash at the 2026 KoroBoro Inter-House Swimming Carnival!

The **KoroBoro Inter-House Swimming Carnival** will be held at the **Taurama Aquatic Centre** on **Friday, 30 October 2026**. All students will participate as part of their Swimming Learning Unit, competing in one of three pools based on their swimming ability.

Pool 1 (Advanced Swimmers) will compete for house points and selection into the School Swim Squad. **Pool 2** (Intermediate Swimmers) will race for house points, while **Pool 3** (Beginner Swimmers) will participate with swimming aids and also contribute points to their houses.

Students are encouraged to wear their house colours and demonstrate teamwork, sportsmanship, and perseverance. Parents are warmly invited to come along and support our swimmers in what promises to be a fun-filled, exciting, and rewarding day for all.

Music Activities at KORO

Music activities in a music lesson help students develop their musical skills, creativity, and confidence. During the lesson, students participate in singing songs, clapping rhythms, listening to different types of music, and playing musical instruments. They also learn about musical elements such as rhythm, melody, tempo, and pitch. Through these activities, students improve their listening skills, coordination, teamwork, and self-expression. Overall, music activities make learning enjoyable, encourage active participation, and help students appreciate the importance of music in their daily lives.
