Bus Routes and Stops

Procedures

- Each student is assigned one (1) designated bus stop for the pickup address and one (1) designated bus stop for the drop-off address.
    - This stop may be for the home residence or a sitter location, but must, in all cases, be a residence or daycare facility, and at no time be for a business location.
    - These stops must remain constant, consistent, and not be changed on a day-to-day, weekly, or other basis.
    - These stops will be for the home address unless a modification form is on file at the transportation office of the Elida Local Schools.
- Open enrollment students must have a modification form on file before any transportation commences.
- Bus passes will be considered in an emergency situation only.
- School bus stops shall be located within one-half (1/2) mile (2640 feet) of a student's residence or a through roadway.
- In case a residence is on a street with no outlet, the stop shall be located to meet one (1) of the following:
    - The residence on the dead-end street one-half (1/2) mile (2640 feet) or less from a traveled cross street shall have the stop designated at the intersecting streets.
    - The residence on the dead-end street over one-half (1/2) mile (2640 feet) from the travel cross street shall have the stop located on the street within one-half (1/2) mile (2640 feet) of the residence, only when a cul-de-sac is available, or in the case where no cul-de-sac is available, the residents shall provide a suitable area for a safe turnaround.
- No stops in the immediate area of the high school and middle school for students in grades 6-12. This area will be north of Elida Road and east of Greenlawn Ave (including Greenlawn). For grades K-5, the no busing area will be for those students living on Beechwood, Wildwood, and Weger. Those residences considered to be rural are excluded from this.
