Pilot #1- Teacher Collaboration 2024-25

Each week the organization of the collaboration time will alternate: one will be administratively planned and the next will be planned by teachers utilizing a common site based sign-up sheet. Prior to the start of work year the site administrator will inform staff of the dates of the administratively planned and teacher planned collaboration days. When **a Monday** is a non-instructional day, such as a holiday or break, that day will not count in the rotation.

The purpose of collaboration time includes but is not limited to: carrying out the goals outlined in the District's Local Control and Accountability Plan; examining student assessment systems and data; grade level, department/subject matter, and site-wide meetings; discussion of intervention/modification/differentiation possibilities; and implementation of District and site initiatives.

As scheduled, teachers will provide information on Friday prior to teacher collaboration, and principals will provide an outline by Friday, prior to administratively planned collaboration meetings. A Google Doc with the following will be created for each site.

Pilot expires June 30, 2025

Teachers are invited to create a weekly or ongoing collaboration group to work on a curricular/teaching strategy or topic to improve student learning. This will result in continued curricular innovation and greater Teacher Clarity.

- Submit a plan below. (Google Doc- sent out by site)
- Recruit other staff members (group of 2 or more)
- Record notes, needs, next steps, and accomplishments

Group Topic: Name of Lead Teacher: Location: Date(s) met: What are you learning about? How is this relevant to student learning? How will you measure the impact of your collaboration?		
Team Members		
Notes, Needs, Next Steps, and Accomplishments (record results here can be a bulleted list or link to a group document)
