

Savings Connect

Connecting You to Lower Rx Costs

As a Navitus member, you look to us to deliver the best value and lowest cost on your prescriptions. And we are constantly looking for new ways to make your medications more affordable.

Discount cards are being used to lower prescription costs at the pharmacy. But when people - like you - who have insurance use a discount card, the cash price you pay may not apply to your deductible. You miss out on savings because the discount card and your pharmacy benefit are not connected.

That's why we've partnered with GoodRx®, the largest discount card in the industry, to provide even more savings with your pharmacy benefit plan.

How It Works

With Savings Connect, Navitus is helping lower the costs of your health care.
Savings Connect provides a real-time drug price check for many generic products. It compares the out-of-pocket cost of your generic drug under your pharmacy benefit to the discount card price. You pay whichever is less.

What do I have to do?

Just present the card you use for prescription benefits to the pharmacy staff. You can have confidence knowing that you are getting the best price on your generic drugs!*

Savings Connect Comparison

Original plan copay:	$10
GoodRx Price:	**$7**
You pay:	$7
You save:	$3

*Savings may vary depending on drug and/or pharmacy. Other limitations may apply.
