EXECUTIVE SUMMARY

June 18, 2019

TO: School Board Members

FROM: Keith Oswald, Deputy Superintendent/Chief of Schools
Mark Howard, Chief, Performance Accountability

SUBJECT: **FY14 THROUGH FY18 SCHOOL DISTRICT OF PALM BEACH COUNTY (DISTRICT) HIGH SCHOOL GRADUATES COLLEGE MATRICULATION SUMMARY**

The School District of Palm Beach County (District) has received the FY14 through FY18 high school graduates college matriculation data from the National Student Clearinghouse (NSC). The NSC is an independent organization that tracks the postsecondary enrollment and success of students in more than 3,300 colleges and universities nationwide. The District has contracted with the NSC to provide data on our students to better understand postsecondary patterns and success. This report informs our progress toward the District Strategic Plan Long Term Outcome of "Preparing Students for Postsecondary Success".

The Department of Research and Evaluation (DRE) has performed a preliminary analysis of the data on students who graduated from the District between FY14 and FY18[1]. It is important to note that the NSC subscription of postsecondary institutions has declined from FY14 to FY18. Some institutions attended by District graduates who participate in the NSC may change from year to year. This fluctuation may contribute to changes in enrollment from year to year.

CONCLUSIONS

The conclusions of the analysis of FY14 through FY18 data are as follows:

- 64% of District graduates enrolled in a postsecondary institution (Table 1)[2] in the Fall after graduation, a decrease of 4% compared to FY17
- More female graduates (70%-73%) were enrolled in a postsecondary institution than male (59%-66%) (Table 5).
- Fewer Black (61%-64%) and Hispanic (58%-63%) graduates were enrolled in a postsecondary institution than white graduates (72%-76%) (Table 5).
- From FY13 to FY16, the persistence rate for District graduates was higher (83%-86%) than the National persistence rate (70%-74%) (Table 11).

[1] Graduates are defined as end of year twelfth-graders who earned a standard diploma and are in the state four-year federal cohort (which does not include special diplomas or GEDs).

[2] For FY18, the overall enrollment was lower than FY17. This may be due to several colleges and universities that have withdrawn from the National Clearning House or some students degree and/or enrollment record is blocked.

GENERAL FINDINGS

FY14 THROUGH FY18 ENROLLMENT

- Enrollment in the fall after graduation
  - About two-thirds of District graduates attended a postsecondary institution (Table 1).
  - For FY18, the percent of District graduates attending a postsecondary institution (64%) was lower than the percent of national high school graduates (69%)[3](Table 1).
  - Most students attending college enrolled in a public college or university (Table 2), an in-state institution (Table 3), or a four-year college (Table 4)[4].
  - White students, when compared to other race/ethnicities, held the highest percent of graduates enrolled in a postsecondary institution, as did female students when compared to male students (Table 5).
  - For all years, Palm Beach State College has been the most common college choice for District graduates (Table 6).
  - More than 72% of District graduates with SAT reading or math score above 500, enrolled in a postsecondary institution (Tables 7-8).
  - For those District graduates who had an FSA ELA/FCAT Reading Level 4 or 5 in their eighth grade year, 74% - 87% entered college; 44% - 50% of graduates who had FSA ELA/FCAT Reading Level 1 in their eighth grade year, enrolled in a postsecondary institution; and, 57% - 60% of graduates who had FSA ELA/FCAT Reading Level 2 in their eighth grade year, enrolled in a postsecondary institution (Table 9).

- Enrollment rates in the years after graduation
  - From FY14 to FY15, 81% - 84% of District graduates enrolled in college within the first four years after graduation (Table 10).

FY13 THROUGH FY17 PERSISTENCE

- From FY13 to FY17, the persistence rate for District graduates enrolled in college (83%-86%) was higher than the National persistence rate (70% - 74%) (Table 11).

FY11 or FY12 DEGREE COMPLETION

- The total for those FY11 or FY12 graduates who completed a degree in six years was higher (63% for FY11 and 67% for FY12 , Table 12) than the National completion rate (57% for FY11)[5].

SCHOOL TABLES

ENROLLMENT

Tables 13 through 14 show postsecondary institution enrollment statistics in the fall for District operated high schools and Tables 15 through 16 provide the enrollment statistics for District charter high schools. A statistical test of independent proportions (TIP) was conducted for each of the 24 District operated high schools and ten charter schools to compare with the District average. The TIP results for FY18 reveal that:

- Nine district operated high schools had significantly higher percent of enrollment in postsecondary institutions than the District average enrollment (Table 13).

[3] Reported by the U.S Bureau of Labor Statistics: https://www.bls.gov/news.release/hsgec.nr0.htm
[4] The National Student Clearinghouse has classified Palm Beach State College (formerly Palm Beach Community College) as a four-year institution for all years in this analysis.
[5] From National Student Clearinghouse report https://nscresearchcenter.org/signaturereport12/

- One charter school had significantly higher percent of enrollment in postsecondary institutions than the District average enrollment (Table 15).
- Compared to the District average, 11 District operated high schools and one charter school had a significantly higher percent of student enrollment in four-year postsecondary institutions.
- No district operated high schools had a significantly higher percent of student enrollment in two-year postsecondary institutions (Table 14, Table 16).

Tables 17 through 19 show comparsion of postsecondary institution enrollment with the national benchmarks.

- For FY17 graduates
    - Fourteen District operated high schools (Table 17) had a significantly higher percent of enrollment in postsecondary institutions than the national average enrollment in the same category schools.
    - Five District operated high schools (Table 18) had a significantly higher percent of enrollment in postsecondary institutions than the national average enrollment in the same poverty category schools.
    - One charter school (Table 19) had a significantly higher percent of enrollment in postsecondary institutions than national charter schools.

PERSISTENCE RATE

Table 20 shows persistence rate for District operated high schools graduates enrolled in college and Table 21 provides the persistence rate for District charter high schools. A statistical test of independent proportions (TIP) was conducted for each of the 24 District district operated high schools and four charter schools to compare with the District average. The TIP results for FY17 reveal that:

- Seven district operated high schools had significantly higher persistence rate in postsecondary institutions than the District average persistence rate (Table 20).
- No charter school had significantly higher percent of persistence rate in postsecondary institutions than the District average persistence rate (Table 21).

Tables 22 and 23 show comparsion of persistence rate for District graduates enrolled in college with the national benchmarks.

- For FY15 graduates
    - No District operated high schools (Table 22) had a significantly higher persistence rate than the national average persistence rate in the same category schools.
    - No charter schools (Table 23) had a significantly higher persistence rate than the national average persistence rate than national charter schools.

DEGREE COMPLETION

Table 24 lists the number of District FY11 and FY12 (six-year cohort) graduates from District operated high school graduates enrolled in postsecondary institutions and the percent achieving highest degrees from postsecondary institutions while Table 25 lists the highest degree results for charter schools.

Tables 26 through 28 show comparsion of highest degree completion for District graduates with the national benchmarks.

- For FY11 graduates
  - Thirteen District operated high schools (Table 26) had a significantly higher six-year degree completion rate, than the national average six-year degree completion rate in the same category schools.
  - Five District operated high schools (Table 27) had a significantly higher six-year degree completion rate in postsecondary institutions than the national average benchmark in the same poverty category schools.
  - No charter school (Table 28) had significantly higher and one had significantly lower six-year degree completion rate than national charter schools

PERSISTENCE RATE

Table 11. First-Year persistence rate* for the District high school graduates enrolled in postsecondary institutions

Cohort Year	District Enrolled Count	District Persistence Rate	National Persistence Rate	National 20 (age) and under** Persistence Rate
FY17	8078	84%	NA	NA
FY16	7361	83%	74%	77%
FY15	7262	85%	73%	78%
FY14	7399	86%	72%	78%
FY13	7018	86%	70%	76%

* Persistence rate is the percentage of students who return to college at any institution for their second year.

**National Persistence Rate is from National Student Clearinghouse https://nscresearchcenter.org/snapshotreport33-first-year-persistence-and-retention/?hilite=%27snapshotreport%27%2C%27persistence%27

[8] Graduates are defined as twelfth-graders who earned a standard diploma and are in the state four-year federal cohort (which does not include special diplomas or GEDs). College enrollment does not include students who joined the military after graduation.

[9] Fall is defined as anytime during the calendar year of graduation (e.g., May to December); the second calendar year is the May-Next year July; the third calendar year is August-Next July, etc.

DEGREE COMPLETION

Table 12. Count FY11 to FY14 for the District high school graduates enrolled in postsecondary institutions and degree completion rate

Cohort Year	Count	Percent for Any Degree	Percent for Highest Degree with Other	Percent for Highest Degree with AA	Percent for Highest Degree with BA	Percent for Highest Degree with MA and Above	National Degree Completion Rate
FY11	6427	63%	2%	16%	42%	1%	57%
FY12	6579	67%	2%	16%	45%	4%	NA
FY13	6998	62%	2%	17%	41%	2%	NA
FY14	7305	52%	2%	20%	30%	0%	

Note: With any of the Degrees,

- Other - Received Certificate or other Diploma as the Highest Degree
- AA - Received Associate's Degree as the Highest Degree
- BA - Received Bachelor's Degree as the Highest Degree
- MA and Above - Received Master's Degree and above as the Highest Degree
- FY11 and FY12 are six-year degree completion; other are the completion by the end of 2017

**National Persistence Rate is from National Student Clearinghouse Report for FY11:https://nscresearchcenter.org/signaturereport14/ for FY10:https://nscresearchcenter.org/signaturereport12/
