Virgin Islands Department of Education Invites Community to the Math Science STEM Summer Research Academy Culminating Presentation

The Virgin Islands Department of Education (VIDE), Division of Curriculum and Instruction, invites parents, families, educators, community partners, and the public to attend the Math Science STEM Summer Research Academy (MSSSRA) Culminating Presentation on Thursday, July 9, 2026, from 9:00 a.m. to 11:00 a.m. in the St. Croix Central High School Cafeteria.

The culminating presentation marks the conclusion of the academy and celebrates the dedication, curiosity, and achievements of student participants who have spent the summer engaging in authentic STEM research and hands-on scientific investigations.

During the event, students will present the research projects they have developed throughout the academy, demonstrating their ability to apply scientific inquiry, analyze data, solve real-world problems, and effectively communicate their findings. Their presentations will reflect significant growth in critical thinking, collaboration, innovation, and communication, skills that are essential for success in today's rapidly evolving STEM fields.

The Math Science STEM Summer Research Academy provides students with meaningful opportunities to explore science, technology, engineering, and mathematics through inquiry-based learning and research. The MSSSRA Culminating Presentation highlights the Department's continued commitment to expanding high-quality STEM learning opportunities that inspire innovation, cultivate future leaders, and prepare students for college, careers, and lifelong success.

The Virgin Islands Department of Education encourages the community to attend and support these outstanding student researchers as they showcase the knowledge, skills, and discoveries they have gained throughout the academy.
