FLORIDA
ready to work
powered by WIN

State-sponsored foundational employability skills training and credentialing solution.

Online career-contextualized training develops the foundational skills required by most jobs, across industries. The training is self-directed, self-paced, and accessible from any computer or tablet any place, anytime.

Soft Skills Training teaches employability and social skills in a career context. Modules include Communicating Effectively, Conveying Professionalism, Promoting Teamwork & Collaboration, and Thinking Critically & Solving Problems. The courseware offers a blended learning approach with offline project-based activities and capstone projects to supplement the interactive digital curriculum.

Digital Skills Training is a self-paced course that provides learners with the skills needed to navigate technology in the workplace. Modules include Computer Operations, Internet Browsing, Digital Communication, Digital Documents, and Digital Security.

Academic Employability Skills Training offers a series of career-focused modules to improve learners' readiness in foundational academic employability skills including math, reading, and data. The courseware can be self-paced or delivered by an instructor, and all content addresses core skills required for entry into all 16 national career clusters.

Each training module contains a course component that includes instructional content, a knowledge-check quiz, and practice exercises that allow learners to apply the skills to real life, practical situations. To complete each module, learners take a posttest to recap what they've learned.

The posttest at the end of each module measures mastery of content. When the learner scores 80% or greater on the posttest, they earn an eBadge and advance to the next module. When learners have completed every module and earned their eBadges, they earn a Certificate of Completion.

Did you know...

Learners who successfully complete the training courseware can access digital versions of their eBadges and Certificates of Completion. These digital badges can be shared on social media, added to an email signature, included in an online portfolio or resume, and more.
