Google Additional Services Consent & Artificial Intelligence (AI) Use Acknowledgement

GOOGLE ADDITIONAL SERVICES - PARENT/GUARDIAN CONSENT

Othello School District and our teaching staff use Google Workspace for Education to support instruction, communication, collaboration, and student learning. District-managed student accounts provide access to Core Services, including Classroom, Drive, Docs, Sheets, Slides, Gmail and Calendar, subject to district configuration.

Google also offers separate Additional Services that may operate under different terms and privacy practices. The District may approve particular Additional Services for educational use only after reviewing instructional value, age appropriateness, privacy, and available administrative controls. The District seeks your consent before enabling the approved Additional Services listed below for your student through a district-managed Google account.

Proposed services for instructional use: YouTube (educational videos); Google Earth (geography and satellite imagery); Google Maps and My Maps (mapping and projects); Google Translate (language support); Google Arts & Culture (art and history); Chrome Web Store (district-approved extensions); and Chrome Canvas (digital drawing). Only District-approved services will be enabled.

Choose one (required):

YES - I consent to my student accessing the District-approved Google Additional Services identified above through their school-managed account.

NO - I do not consent to my student accessing those Additional Services through their school-managed account. I understand that while classroom activities may involve these educational tools, my student will not be permitted to use the resources and will have different expectations when available, but may exclude them from a classroom activity.

Declining or withdrawing consent: You may select NO above or contact your student's school office at any time to request withdrawal of previously granted consent. The District will restrict access through available administrative controls. Declining these services does not by itself remove access to Google Workspace Core Services. Where needed, staff will work with families on reasonable instructional alternatives.

ARTIFICIAL INTELLIGENCE (AI) USE - FAMILY ACKNOWLEDGMENT

Othello School District supports a human-centered approach to Artificial Intelligence. AI enhances, not replaces, student engagement, critical thinking, collaboration, and original work. Student use must be age-appropriate, teacher-directed, and limited to District-approved tools. AI outputs can be inaccurate or biased, and students must not enter confidential, sensitive, or personally identifiable information into unauthorized AI tools.

AI Learning Progression

Grades K-4: Teacher-supported learning without direct student AI use.
Grades 5-6: Teacher-guided AI foundations.
Grades 7-8: Thoughtful AI use with evaluation of accuracy and bias.
Grades 9-12: Strategic and ethical use for learning and real-world tasks.

RED - AI FREE	YELLOW - TUTORING & REVISION	GREEN - COLLABORATION
No AI use for the assignment.	AI may explain or give feedback after initial work; it may not create or rewrite the work.	Teacher-directed brainstorming, research, and idea development; student owns final work.

Teachers will communicate the permitted level of AI assistance for applicable assignments. Students must disclose how AI was used and remain responsible for the accuracy, integrity, and understanding of submitted work. This acknowledgement does not authorize unrestricted access to AI products or override any separate consent required for a specific platform.

PARENT/GUARDIAN ACKNOWLEDGEMENT & SIGNATURE

By signing, I confirm that I have reviewed the information above, have made the separate Google Additional Services consent selection, and acknowledge the District's AI Instructional expectations.

Student Name: _____ School/Grade: _____

Parent/Guardian Name: _____ Date: _____
