BEAR BROADCAST

MISSION: POSSIBLE - LAUNCHING STUDENT SUCCESS

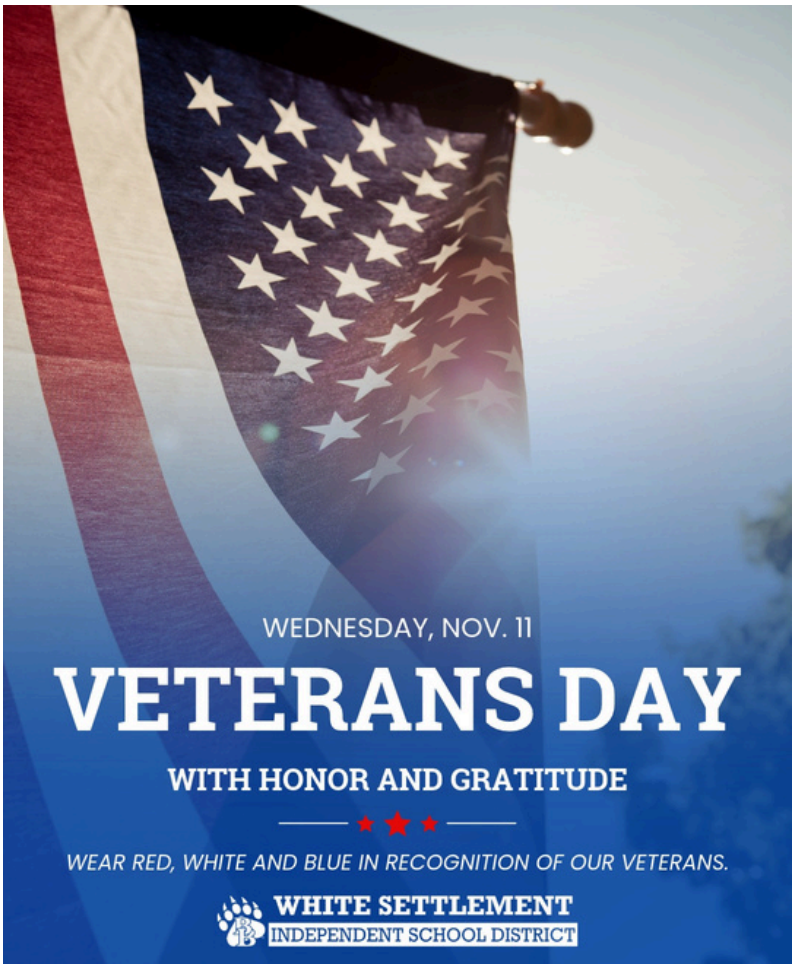

WSISD Launches Academic Dashboard

White Settlement ISD is committed to transparency, accountability, and continuous improvement. Upon the recommendation by the WSISD Board of Trustees, WSISD staff created a new public dashboard that provides families and the community with a clear, accessible view of key indicators of district performance, including student achievement, attendance, enrollment, and college and career readiness.

By sharing data in one central location, we aim to celebrate successes, identify opportunities for growth, and demonstrate our commitment to making informed, data-driven decisions that support student success.

Thanksgiving Food Drive

Help families in need this Thanksgiving, and donate to the WSISD Thanksgiving Food Drive now through Nov. 11. Donations are accepted at every school and at the WSISD Administration Building. Click the link to make a monetary donation.

Bears advance to Bi-District Playoffs, Get tickets early for Thursday night's football game

The Brewer High School football team takes on Azle this Thursday night for the Bi-District Championship. The boys head into the playoffs as the No. 1 seed. Come out to Brewer Bear Stadium and show up loud and proud for our boys!

Kickoff is 7 p.m. Adult presale tickets are $7, and student tickets are $5. Tickets are $9 on game day.

Notice of sampling for lead in water samples in WSISD schools

The City of Fort Worth has partnered with the Lead Testing in Schools and Child Care Program to implement mandatory lead testing by the Texas Commission on Environmental Quality (TCEQ) in all elementary schools.

Lead is a heavy metal, and some drinking water pipes, taps, solder, and other plumbing materials contain lead. For more information about the sources of lead and health effects, click here.

TCEQ will: identify outlets used for drinking and food preparation; collect water samples at those outlets; analyze collected samples using an accredited drinking water laboratory; review results; take action to reduce exposure to lead, as needed; and continue to work to reduce any potential lead exposure at its facility.

Results will be available on TCEQ's LTSCC Program webpage For more information about the program, visit the webpage, email info@txleadtesting.org, or call (737) 276-1987.

In the event that lead is found, WSISD will communicate with families regarding next steps.
