Primary - dressing for all weather

It can be tricky knowing what your child might need for all the different types of weather in Norway. This overview gives you an idea of what they should wear by temperature range. If it is raining, your child will need rain gear and boots. They can wear this over their regular clothes. If it is cold and wet, they should wear warm layers under their rain gear.

12+ degree celsius

If it is raining, your child will need rain gear and rain boots. They can wear this over their regular clothes.

8-12 degrees celsius

Regular clothes and good rain gear as above. A warm fleece under the rain gear is a good idea. Rain gloves with a pair of thin wool gloves to wear underneath.

5-8 degrees celsius

Wool inner layer and fleece under their rain gear. Wool socks are a must to help keep feet warm if they are using summer rain boots. Along with the rain gloves and thin wool gloves. A thin hat is also good to use during this time.

Primary - dressing for all weather

0-4 degrees celsius (with rain)

Your child will need a wool inner layer and fleece along with their snowsuit and rain gear. We put the rain gear over to help the snow suit stay dry. A good pair of wool lined boots are a must at this temperature. Once again rain gloves and wool gloves underneath. Most winter gloves are not made to stay dry in the rain. A hat is nice to keep the head and ears warm.

0 degrees celsius (or below)

Wool and fleece daily along with a snowsuit, good winter gloves and wool lined boots or winter appropriate boots. Also, a hat that keeps the ears covered is a must. See the picture for an example.
