Long-Range Planning

The Swallow School District's Long-Range Planning process engages stakeholders – including students, parents, staff, business owners, and community residents -- who are all invested in the success of our students as well as our district. The ownership of those involved in the process yields both comprehensive Plans grounded in educational next practice and the community's values, while also fostering partnerships to support the plan's implementation. Our district is a leading public educational institution because of this inclusive process and the resultant direction of continuous improvement efforts.

As the basis for continuous improvement, the district has a Strategic Plan. To ensure the district's facilities can support the district's goals and objectives, the district is developing a Master Facilities Plan. Taken together, they comprise the district's Long-Range Plan. More information about each is available using the tabs to the left.
