Health Reminder:

This is a reminder to please check your child's head on a regular basis. Lice are tiny grey to brown insects about the size of a sesame seed that live in human hair and feed on human blood to survive. Lice do not fly or jump, but crawl quickly with head to head contact. Eggs are a tiny white oval-shape about the size of a knot in a thread that attach to strands of hair. If you find lice or eggs please treat your child immediately and let the school know so that we may keep track of the number of cases. Remind your child not to share hats, clothing with hoods, or combs/brushes and don't take pictures with friends with their heads together. Checking your child's head and treating your child and the environment immediately is the best way to combat the lice.
