Flintrige Prep AI Framework in the Curriculum (2026)

Created by the AI Working Group: Bailey Parsons, Dr. Charles Kollmer, Eli Jaffe, Jenny McHargue, Josh Perlman, Ladi Oyediran, Dr. Lauren Van Arsdall, and Dr. Shane Frewen

At Flintridge Prep, we believe that our Honor Code extends beyond human interaction into our digital lives. We also recognize that, while AI can support the learning process, it can never replace the essential cognitive struggle required for growth.

We are committed to the following pillars:

- **Embrace the Personal Journey:** We prioritize the creation of a human-centered Flintridge Prep community, ensuring that AI supports, rather than replaces, each student's path of self-discovery and skill mastery.
- **Seek New Perspectives:** Through our AI Working Group and dedicated school-sponsored professional growth, our faculty continues to explore how generative tools can inform our pedagogical horizons and prepare students for a complex future.

- **Leave No Question Unasked:** We empower students to drive conversations about AI on campus, and we commit to discussions which will both protect learning and encourage creative and responsible engagement with AI.
- **Lead with Integrity:** We commit to transparency in how AI is used. Recognizing the rapid pace of technological change, we pledge to continually reexamine our policies and to ensure our guidance remains ethical, safe, and relevant.
