Weekly 7th Grade Newsletter

Morningside Middle | November 12 | Issue #12

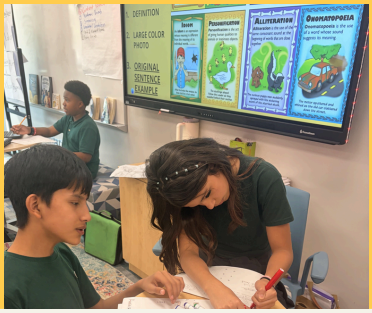

This Week in our Classrooms

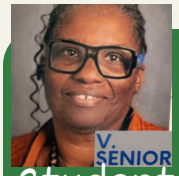

ELA

domonique_finey@charlestoncountyschools.gov

Scholars will be reading the poem "My Mother Pieced Quilts" to explore how point of view shapes a reader's understanding of a poem. They will analyze how the poet uses personal experiences, imagery, and descriptive language to convey meaning before putting their creativity to work by writing their own original poems from the mothers perspective. Scholars will also complete another Text-Dependent Writing (TDW) assignment, using textual evidence, reading comprehension, and writing skills to support their responses and strengthen their preparation for SC READY.

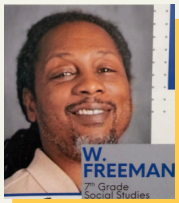

Mathematics

vanessa_senior@charlestoncountyschools.gov

Students will solve problem involving Markup and MarkDown and Simple Interest. Students wil create a menu for Thanksgiving using Tax, Tips, Markup, Markdown .

In Honors students will be able to interpret a variety of graphs. Students will discover stem-and-Leaf Plots to represent data.

Social Studies

William_freeman@charlestoncountyschools.gov

Students will continue to explore world regions and the Five Themes of Geography. Our goal is to help students better understand how places around the world are connected and how geographers study the people, places, and environments that make up our world.

UPCOMING TRIPS

-Top Golf - Nov 20

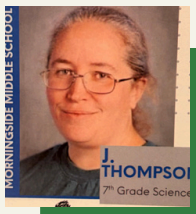

(Attendance 80%, no referrals, currently passing)

-Mega Recess - Dec 17

(30 ELA & 30 MATH IREADY COMPLETED BY DEC 10!)

Parents of Scholars with Individualized Education Plans (IEPs): Please take a few minutes to review your scholar's accommodations and goals with them. This will help your scholar understand the support available to them, recognize their learning goals, and take an active role in their academic growth and success. Working together helps ensure that scholars feel confident, prepared, and empowered to make progress toward their goals.

Science

jennifer_thompson@charlestoncountyschools.gov

Students are working on a research project in our last weeks before Thanksgiving break. During this project they will demonstrate mastery of SCCCR Standard 7-PS3-5 "Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object." By investigating a real-world system, students will identify and argue where energy comes from and goes to as it enters, moves through, and leaves a system.

Don't forget your weekly homework!

Ella Williams

Ella is a remarkably self-motivated and academically exceptional student who consistently strives for excellence at the top of her class. Driven by a natural inquisitiveness and a creative approach to problem-solving, she engages deeply with every lesson. What truly sets her apart, however, is her warmth—her focused work ethic is paired with an upbeat, welcoming presence that makes her a friend to everyone in the room.
