A message from Dr. Latanya Daniels Superintendent of District 191

Finding Joy and Community Through Education

Winter in Minnesota can feel long and dark and isolating. While there's certainly nothing wrong with finding a comfortable place to quietly enjoy a book while snow falls outside, it's also important to find ways to be connected to our neighbors and experience joy during the winter months.

One of the best and easiest ways to do that is in your hands (or on your screen) right now: Community Education.

Our K-12 schools provide numerous activities and athletics for students all year long, both indoors and outdoors. But the range of learning opportunities provided through Community Education is truly astounding.

I expect that as you read through this catalog, you'll find more than a few classes, groups and events where you can be in community with others and find joy in learning. Maybe you're hoping to learn a new skill like cooking or even a new language. Maybe you're thinking about starting your own business or starting to practice yoga. Maybe you want to learn about your neighbors and their culture over a meal at one of our Community Dinner series events.

Whatever it is, I'm so glad you're looking to find and spread some joy through education, and I'm so grateful that you are part of the One91 Community.

Sincerely,
Dr. Latanya Daniels, Superintendent

Accidental Presidents

Who changed the course of American History?

Nine presidents never completed their terms in office. Four died of natural causes, four were cut down by an assassin's bullet, and one resigned in disgrace.

There have also been as many as ten "Near Misses." Each death and the single resignation changed the course of American history.

Together we will examine how these changes occurred, how they changed American history for better or worse, and the story behind why these nine presidents left office before their terms were up, and the stories behind the men who replaced them.

We will look at census records, newspaper/obituaries, marriage and baptism/christening records with an emphasis on who were the witnesses or sponsors to those events, land deeds, and family papers.

We will also focus on a woman's children's vital records and Social Security applications as a tool for finding her name. This class has many great examples from women from all walks of life and time periods.

NEW! The Meyers Brothers Mystery

Using a FAN network to rediscover an extended family

Brothers Phillip and Charles Meyers never appear in a census in the same household in the United States. This family mystery was solved by leveraging a family cluster to fill in incomplete records for 1830s immigration from Germany to New York City and eventually to Chicago. We will be discussing how to work around missing census records, incomplete indexing of church records, and encourage you to examine all FAN network family members.

Clustering of data from adjacent family members gave us the "clue" to what region of Germany to explore and led to successfully locating this family in the 1790s to 1820s Rhineland-Pfalz. This case was challenging due to the time period, lack of existing records, and the death of the parents of Phillip and Charles, likely in their childhood. This class will describe some methods, tricks, and tips you can use in breaking down brick walls in your family immigrant research.

Language & Culture

Bonjour for Adults! Live Online via Google Meet

This course is designed to mirror the immersive, communication-based approach used in elementary French immersion programs, helping you experience what it feels like to learn through the language, not just about it. Rather than focusing heavily on grammar, you'll build confidence speaking and understanding French in real-life situations, from ordering at a cafe to navigating everyday interactions. Classes are conducted primarily in French, with supportive guidance in English when needed, creating an engaging and accessible immersion experience for beginners.

Roxanne May is a French immersion educator at Normandale Elementary with over 13 years of experience, a Master's degree in literacy education, and a deep personal connection to the language as a French speaker, for a unique virtual class taught live from France.

ECFE Early Childhood Family Education

All classes are held at Diamondhead Education Center unless otherwise listed.

Our ECFE classes offer warm, welcoming environments where the entire family can learn, play, and connect. During activity time, parents and children explore engaging play-and-learn stations designed to spark curiosity, creativity, and discovery. Families enjoy quality time together while building relationships with new friends and reconnecting with familiar faces.

Parent discussion opportunities provide support, encouragement, and practical information relevant to raising children in today's world.

Two-hour classes include parent-child activity time followed by a parent discussion group led by a licensed Family Educator in a separate space.

Ninety-minute classes keep families together for the entire session, with parent discussion woven more informally into the class experience.

Tuition is based on a sliding fee scale which is determined by total family income. See page 61 for registration and tuition information.

Ready! for Kindergarten

For Parents and Guardians of Children Birth to Pre-Kindergarten

The READY! for Kindergarten® School Readiness program empowers parents and caregivers to succeed in their role as children's first and most influential teachers. READY! provides tools and activities to optimize the natural curiosity of children and to nurture learning and development.

During a child's early years, parents and caregivers play a key role in shaping language, literacy, math, and social-emotional skills. Active engagement of families and caregivers is the most effective way to make those critical developmental years count.

READY! for Kindergarten consists of Age Level Targets©, Training and Tools to Play With a Purpose, making learning at home fun and effective.

Parents attend three 90-minute in-person or online workshops for each of the first five years of their child's life. School districts and organizations offer READY! to help close the achievement gap by partnering with parents so more children succeed in school and in life. Classes and materials are split into 3-part classes - Fall, Winter and Spring. Each session shares with families what you can do with your child to build upon their development in that age group. Age groups are split into 0-1, 1-2, 2-3, 3-4 and 4-5, and offered at each class in both virtual and in-person. Clases virtuales en español. Register online at isd191.arux.app

ONE91 Preschool Sparking the Love of Learning

In preschool, Pathways learning is designed to spark the love of learning.

Our students widen their worlds and build foundational skills to continue their learning journey.

Children learn and grow best through play experiences. We embed skill-building into play to promote healthy development of the whole child throughout the classroom. For example, math skills show up at the snack table, the block corner, and more.

Flexible Programs for Every Family One91 Preschool provides flexible options for families based on schedule, location, and cost. No matter which option, One91 Preschool is ready to spark curiosity, creativity, engagement, knowledge, and a love of learning in each child. Fees are based on income unless otherwise listed. Scholarships may be available for qualifying District 191 residents. **For more information, contact preschool@isd191.org, or 952-707-4110.**
