If you already have the Microsoft Authenticator App installed, use your phone to create your passkey. ***No computer is required!***

1. Open the Microsoft Authenticator on your device.

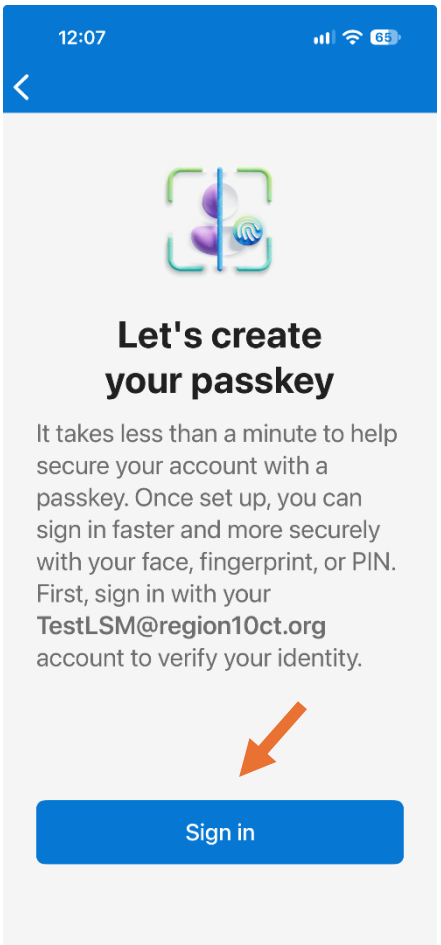

2. Choose your Region 10 account from the list.

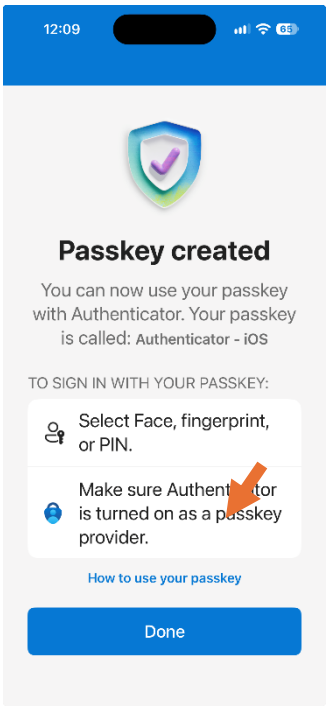

3. Then select **Create a Passkey**

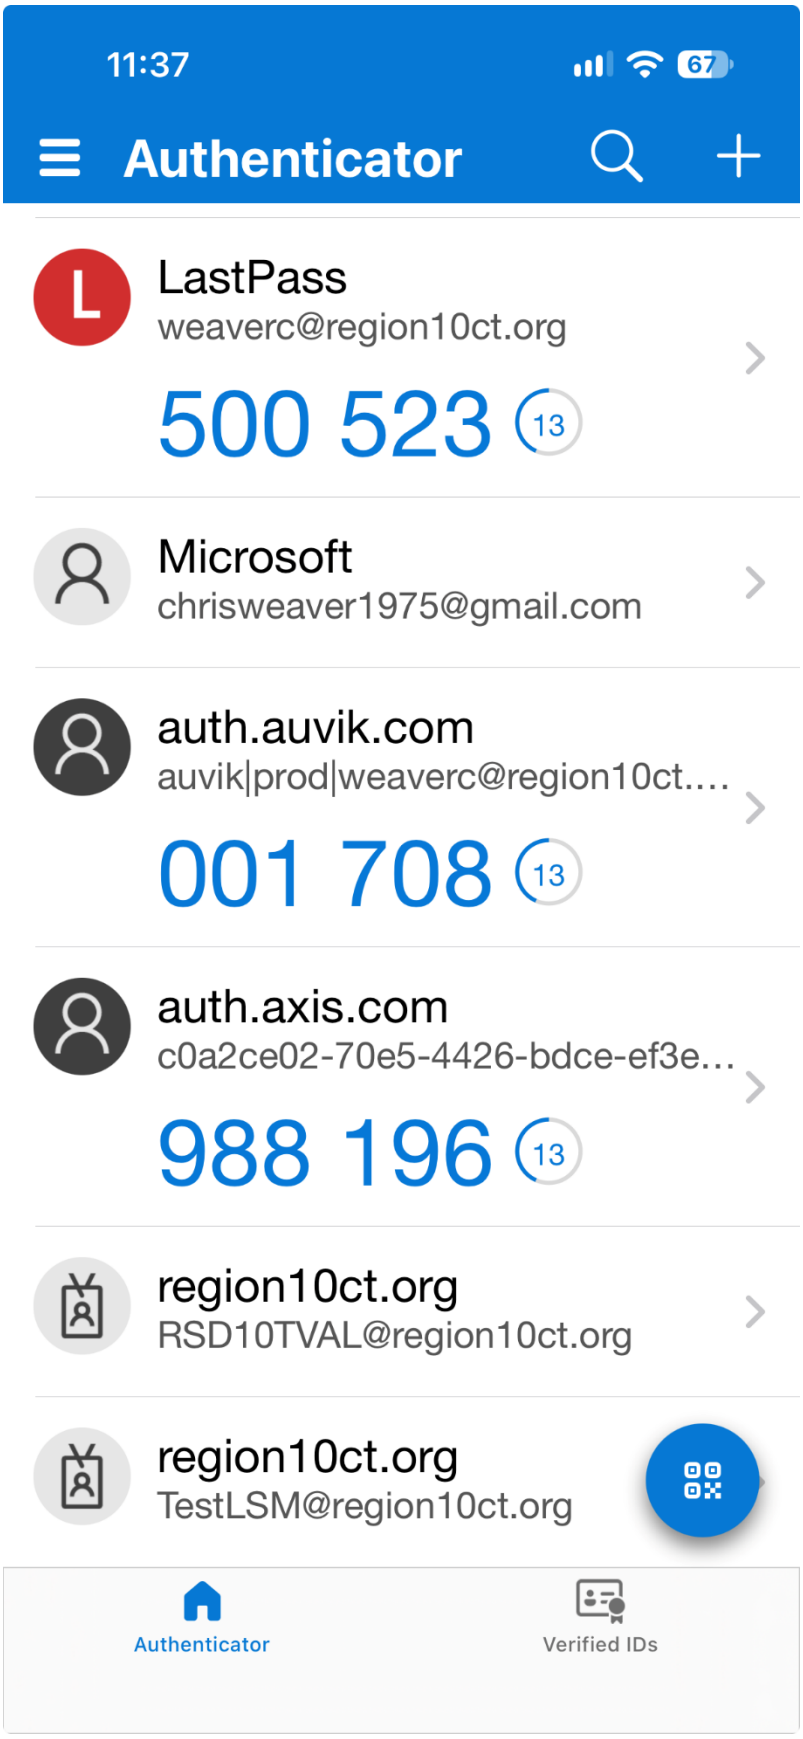

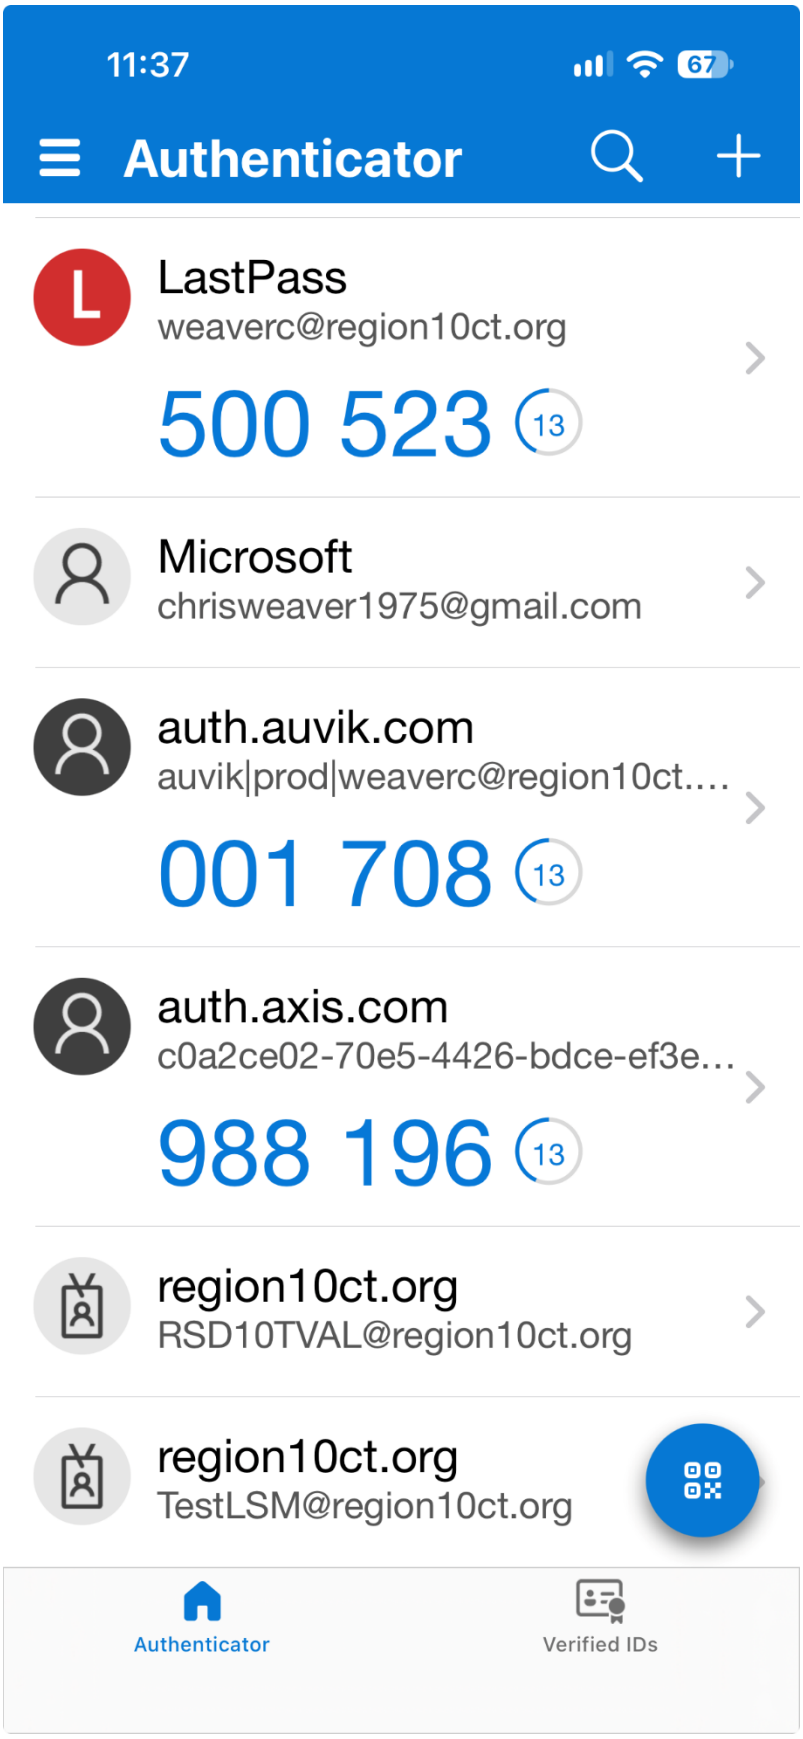

4. You will be prompted to sign in and/or authenticate. Follow the on-screen prompts. Your passkey will be created after you verify your identity.

5. Then select Done when the process is complete. Congratulations you have created a passkey!
