Why the need for a boundary adjustment?

The Olathe Public Schools Board of Education voted to close **five elementary schools** and **one middle school** beginning in the 2027-28 school year.

All current students at closing buildings will be relocated to neighboring school(s).

Goals for Middle School Boundary Adjustments

Long-term Sustainability:

Create boundaries that provide long-term solutions for enrollment projections in all impacted/surrounding buildings

Functional Capacity:

Minimize the possibility for any school enrollment to be above 85% of its functional capacity

Functional Capacity is the number of students a building can educate under current program, staffing and class-size policies. Subtracts specialty rooms.* ***The primary planning number.*

What major factors are considered in establishing new boundaries?

Enrollment Information
(Historic trends, current enrollment, and future projections)

MS Concept 1: Summary of Changes

School	Change
California Trail	Receives the western half of the current attendance area for Heatherstone.
Chisholm Trail	Receives the current attendance area for Scarborough and southern portion of Brougham.
Frontier Trail	Receives the current attendance area for Havencroft and Heritage. Gives the eastern portion of current attendance area for Tomahawk to Pioneer Trail and southern portion of Brougham to Chisholm Trail.
Oregon Trail	No Change
Pioneer Trail	Receives the entire current attendance area for Tomahawk. Gives the western half of the current attendance area for Heatherstone to California Trail.
Santa Fe Trail	Receives the current attendance area for Ridgeview.

schools between 650–750 students

Only impacts 3 schools

Transportation Information

Transportation Eligibility

- **Free Bus Service**: Available to students residing 2.5 miles or more from their assigned middle school.
- **Payride Option**: Offered on a space-available, first-come, first-served basis for students residing between 1.5 and 2.49 miles from their assigned middle school.
- **Transportation Variance**: Offered on a space-available, first-come, first-served payride basis for students that reside less than 1.5 miles to their assigned middle school and reside within a designated Transportation Variance area.

Transportation Variance Criteria

The district may designate a Transportation Variance when conditions within an attendance area create significant concerns for students walking to school. Key factors considered include:

- Roadway speed limits and traffic volume;
- Availability of sidewalks, crosswalks, and other pedestrian infrastructure;
- Complex street crossings, including wide or multi-lane roadways; or
- Railroad crossings and other unique hazards.

The presence of a trained crossing guard is considered an effective safety measure and generally removes the need for a transportation variance at a crossing location.

Frequently Asked Questions

- **Busing Costs (2026/2027)** – Busing for students under 2.5 miles from their home to school is $340 per student for the year. There is a 25% discount for early registration. Families that qualify for free/reduced lunch and meet bus eligibility are eligible for free bus service.
- **Crossing Guard** – School district and City staff will cooperatively determine where to locate the crossing guards across multiple boundary changes.

Next Steps

- Boundary meetings for impacted buildings
- District administration will make a boundary recommendation at the December Board of Education meeting
- The Board of Education will be asked to take action on new boundaries at their January 2027 meeting
- Schools involved in the new boundaries will have dedicated transition teams and ongoing communication to assist with the transition for the 2027-28 school year
