Harvey Elementary Bond Issue Update

FUTURE FORWARD
UTICA COMMUNITY SCHOOLS

OVERVIEW

- Beginning in the spring of 2027 and throughout the 2027-28 school year, a new Harvey Elementary School will be constructed to replace the current facility.
- The new school will include a design that increases safety and represents the district's vision for how facilities can inspire growth and achievement.

These are exciting times at Harvey Elementary.

Beginning in the spring of 2027 and throughout the 2027-28 school year, a new Harvey Elementary will be constructed on our current site for the current and next generation of Eagles.

The new Harvey Elementary School will feature a design that represents the UCS vision of how schools can support student growth and achievement.

During the construction project, Harvey students and staff will continue to attend school within the current facility. The construction areas will be separated from our current building and separate access roads for workers to ensure the safety of our students and staff.

This document provides an overview of the improvements. For more information, please visit: uticak12.org/Harveybond

These are exciting times for our Eagles!

What are the future plans for Harvey Elementary?
A new Harvey Elementary will be constructed on the existing school grounds beginning in the spring of 2027. The new school will replace the existing Harvey Elementary and will open for the 2028-29 school year.

How will the reconstruction benefit Harvey?
The reconstruction will support the district's facility vision to:

- Create additional layers of safety and security
- Support achievement through an environment that fosters engaged learning
- Provide teachers with the flexibility and technology for large and small group instruction
- Offer a modern look that will foster community pride and enhance the desirability and quality of life in our neighborhoods

How will the construction be separated from the existing school?
The construction areas will be separated from school grounds by fencing. The fenced areas will adjust over time as the construction progresses. A dedicated temporary parking area will be created for construction workers and construction traffic will have a dedicated path of travel that will not impact the existing parking lot or drop-off areas.
