- Includes restaurant, retail, and entertainment spaces
- Expected to open late 2026 into 2027

INFRASTRUCTURE INVESTMENT

- $12.4 million in new roadway investments
- 10+ projects in progress at a given time across Fishers

OCTOBER 2026 | ISSUE 2 | VOL 1

BUSINESS HIGHLIGHT OF THE MONTH:

THE CHILDREN'S MUSEUM OF INDIANAPOLIS

What do you offer students?

The Children's Museum of Indianapolis exposes students to all careers to help them discover a variety of paths they maybe hadn't considered before. Students get a variety of opportunities to learn skills, work with experienced staff, and build relationships with mentors. Eva Bruzzese, the intern there, shadows early childhood programs and helps with projects and organizes preschool classrooms.

What impact have students had on your establishment?

The Children's Museum is trying to challenge assumptions about high schoolers about what they're capable of. They want their mentors to "experience what it is like to work with high school interns." The Museum also says they want to show students all the different career opporunities a museum has to offer, from marketing and research to fine arts and education.

Top 10 Coolest Museums in the World (New York Times)

Why do you participate in our program?

Eva attended preschool at The Children's Museum, so having her back there was a full circle moment for them. Matt Inpongpan, the Intern Program Manager, says that they want to give more high schoolers opportunities to work in professional environments.

#1 Best Childrens Museum (USA Today)

STUDENT SPOTLIGHT

Alanna Anthony

Our student highlight for this month is Alanna Anthony. Anthony interns at the Playschool at Arbor Village as a daycare teacher. She helps the kids with their schoolwork, and is “practically a second teacher in the classroom.” She has learned patience and how to deal with different children, such as those with behavioral issues, those who require more assistance with work, and those who talk a lot. Anthony’s favorite part is getting to know the kids she works with. “There is a little girl who is the cutest girl I’ve ever met. Every day that she sees me, she runs up and gives me the biggest hug. That always makes my day.”

“My advice is ASK QUESTIONS.”

Many employees have a lot of different stories, says Anthony, so she encourages interns to ask questions because that’s the only way to learn more. “Even if the question has the most obvious answer, it shows you’re engaged and that you care.”

PROFESSIONAL WORD OF THE MONTH

SCAFFOLDING

giving temporary support or guidance that helps someone accomplish something until they can do it independently
