Sadie Halstead Middle School

We Believe & You Belong

Grizzly Families,

We are pleased to announce that **SHMS** will be offering summer programming for all **incoming 5th-8th grade** students this summer through Discover Works. DiscoverWorks is a ***free, full-day*** summer learning and enrichment program that helps students build reading and math skills while enjoying hands-on activities, healthy meals, field trips, and more.

- The program helps students strengthen academic skills, explore new interests, and stay connected to teachers and classmates during the summer.

- DiscoverWorks supports families by providing full-day care, nutritious meals at no cost, and a safe, engaging environment for students.

As we were just notified of this great opportunity just days ago, we have much planning to do. However, as of now we are looking at a **twenty-five day program, eight hours a day, Monday through Friday, most likely June 28th through July 30th.** Students who attend will engage in Math and English for at least three hours a day, with the remaining five hours dedicated to enrichment activities.

Timeline:

- November 16-30 - Families submit interest form for planning purposes
- December 10-17 - Newport School District provides additional information about this program
- January 5th-8th - Families confirm enrollment for DiscoverWorks Summer Program

With the understanding that we have much more information to come, in order for us to take the next step in planning we need to know what students are interested in attending this summer program. **If you feel your son or daughter would be interested in participating in this great opportunity please respond to the google form linked here.** Submitting this survey does not commit you to attending but will help us plan and we will then continue to provide you with all the information you need to plan this summer.

Thank you, and please reach out to our office with any questions!
