Cambridge Lakes Learning Center

Winter Weather Monitoring

What is this flyer? It explains how Cambridge Lakes Learning Center decides whether to hold a school and campus closure, late arrival, early dismissal or e-Learning day.

✻ WINTER WEATHER ✻

How Are Decisions Made?

Every winter storm is different. Generally, we consider **these four factors**:

1 Snowfall Total

There is no set amount of snow that leads to a decision. We look at how much snow is expected along with the other factors.

2 Snowfall Timing

Heavy snow overnight or in the early morning can make it hard for students, families and staff to travel to school safely.

3 Extreme Cold

An Extreme Cold Warning from the National Weather Service (NWS) may lead to a change in the school day.

-30° The NWS issues this warning when wind chills of **-30 degrees or colder** are expected.

4 Road Conditions

We monitor local road conditions to decide whether students, families and staff can get to school safely.

Safe travel for everyone coming to campus comes first.

Once a Decision Is Made, We Will Let You Know

School email **Phone call & text** **School website** **Social media**
